

Shaswin Kumar

FULL-STACK & LARAVEL DEVELOPER

Email: Shas@craveasia.com GitHub: github.com/devshas-14 Location: Malaysia Focus: Laravel · APIs · Commerce / POS

PROFILE

Backend-focused full-stack developer specialising in **Laravel & PHP**, with strong React/TypeScript and Docker experience. I design and ship production commerce platforms, point-of-sale systems and real-time applications for real retail & F&B businesses — from REST APIs, queues and payment integrations to offline-first mobile apps and on-device hardware. Comfortable owning a backend end-to-end and equally happy building the front-end and infrastructure that ship it.

TECHNICAL SKILLS

Backend	Laravel 9–13, PHP 8.x, REST APIs, Sanctum, Spatie Permissions, Eloquent, Queues & Jobs, Octane / Swoole, Reverb & Pusher broadcasting
Frontend	React 18 / 19, TypeScript, Vite, Tailwind CSS, Ionic 8, Vue 2, Blade
Data & Infra	PostgreSQL, MySQL, Redis, Docker & Compose, Caddy / Nginx, DigitalOcean Spaces, AWS S3, MinIO, Dexie (IndexedDB)
Mobile & Hardware	Capacitor (native Android), Sunmi devices, ESC/POS thermal printing, TSPL cash drawer, QR & barcode scanning
Integrations	Stripe, GKASH, QuickBooks, Xero, Shopify, Lazada, LHDN MyInvois e-invoicing, MediaPipe face recognition, PDF / Excel export
Testing & Tooling	PHPUnit, Playwright, Vitest, Cypress, Git, GitHub Actions

EXPERIENCE

Full-Stack Developer — Crave Asia

2022 – Present

- Lead developer on the **QBot** management/ordering platform and the **February Bloom** commerce & delivery system
- Core full-stack engineer on the Dockerised **QBotu** multi-app commerce platform (4-developer team)
- Own Laravel backend architecture — REST APIs, auth, queues, real-time broadcasting and reporting
- Built offline-first POS apps with thermal printing, cash-drawer control and live multi-terminal sync
- Integrated payments (Stripe, GKASH), accounting (QuickBooks, Xero) and Malaysian LHDN e-invoicing
- Also contributed to the **Appolous** Laravel business-management system (performance & queue work)

SELECTED PROJECTS

QBotu — Multi-App Commerce Platform

Core engineer · team

Docker-orchestrated commerce platform: a Laravel API serving React/TypeScript apps (POS, Kiosk, Tablet, Web) compiled to native Android.

- Laravel 13 + PostgreSQL + Redis + Reverb websockets; 9-service Docker Compose stack
- Stripe & GKASH payments, ESC/POS printing, LHDN MyInvois e-invoicing with MSIC tax codes
- On-device face recognition (MediaPipe) and offline-first sync with IndexedDB

Stack: Laravel 13, React, TypeScript, PostgreSQL, Docker, Redis, Reverb, Capacitor, Stripe, MinIO, Playwright

QBot — Multi-Tenant Management & Ordering Platform

Lead developer

Laravel 11 platform with separate back-office and POS/Kiosk APIs, built and maintained as primary developer.

- Sanctum auth, Spatie permissions and a modular multi-tenant API layout
- GKASH payments, QuickBooks & Xero accounting sync, Pusher real-time events, PDF/Excel reporting

Stack: Laravel 11, PHP 8, Sanctum, Spatie, GKASH, QuickBooks, Xero, Pusher, MySQL

February Bloom — Commerce & Delivery Platform

Lead developer

Laravel commerce & delivery-management platform led for several years.

- Queue-driven background processing, role-based permissions and Shopify integration
- Two-factor auth, QR codes and a dedicated Node print server for PDF generation & receipts

Stack: Laravel, PHP 8, Vue 2, Queues, Shopify, Node, MySQL

QBot POS — Mobile Point-of-Sale

Solo build

Cross-platform POS app packaged for Android with offline support and thermal printing.

- Ionic 8 + React 19 UI, offline-first data via Dexie (IndexedDB), Capacitor-native Android build
- Bundled thermal print service; end-to-end tested with Cypress

Stack: Ionic 8, React 19, TypeScript, Capacitor, Dexie, Tailwind, Cypress

Appolous BMS

Laravel 10 business-management & POS (contributor).

- Laravel Octane (Swoole) + Redis for high-concurrency
- Queue-based email/SMS; Stripe & Lazada; ESC/POS & barcode

QBotu API & Hardware Tooling

Laravel 12 accounting API + Node device tools.

- JWT auth with QuickBooks / Xero accounting sync
- ESC/POS & TSPL printing, cash drawer, Socket.io device bridge
